

Maison Marani

GEORGIAN WINE DEGUSTATION

The only Georgian restaurant in Geneva, "Maison Marani" is inviting you to Georgian wine degustation on Wednesday, 20th March 2024

Georgia has **more than 500 endemic grape varieties** found nowhere else in the world. It was the birthplace of wine, as researchers traced the world's first known creation of wine to 6,000 years before Christ. Georgian winemakers keep grape skins in contact with the juice for days or even months, depending on the region. The traditional Georgian winemaking technique is unique in the world because it is based on the use of "Qvevri" - **large earthenware jars**

You will have a chance to try **premium quality** red, rose, amber, and orange wines from various regions of Georgia. Wine degustation will be accompanied with Georgian snacks.

We are looking forward to seeing you at this exciting wine tasting event
